Telehealth Standard Operating Procedure

Prepared by Marufah Odetundun, MD · De-identified sample documentation

PURPOSE:

This Standard Operating Procedure (SOP) provides comprehensive guidelines for coordinating telehealth appointments, ensuring smooth virtual visits, and maintaining high-quality patient care in a remote setting.

SCOPE:

Applies to all virtual patient appointments including initial consultations, follow-up visits, and urgent care telehealth sessions.

PHASE 1: PRE-VISIT PREPARATION (24-48 Hours Before Appointment)

TASK	RESPONSIBLE	CHECKLIST
Verify patient contact information	Medical VA	■ Email address confirmed ■ Phone number confirmed ■ Preferred platform verified
Send telehealth instructions	Medical VA	■ Platform link sent ■ Login instructions provided ■ Tech support contact shared
Complete technical test	Medical VA	■ Patient tested video/audio ■ Troubleshooting completed if needed ■ Backup phone number confirmed
Gather required documentation	Medical VA	■ Previous visit notes reviewed ■ Lab results compiled ■ Imaging reports attached ■ Medication list updated
Insurance verification	Medical VA	■ Coverage confirmed for telehealth ■ Copay amount communicated ■ Prior authorization checked if needed
Send appointment reminder	Medical VA	■ Email reminder sent (24 hrs prior) ■ SMS reminder sent (2 hrs prior) ■ Calendar invite confirmed

PHASE 2: DAY OF VISIT COORDINATION

TIME	TASK	ACTION ITEMS
15 min before	Pre-visit setup	■ Provider logged into platform ■ Patient chart opened and ready ■ Previous notes reviewed ■ Waiting room monitored
10 min before	Patient check-in	■ Patient admitted to waiting room ■ Consent forms completed ■ Payment collected if applicable ■ Chief complaint documented
5 min before	Final preparation	■ Technical check completed ■ Privacy/environment confirmed ■ Emergency contact info verified ■ Provider notified patient ready
During visit	Real-time support	■ Monitor visit progress ■ Available for technical issues ■ Handle urgent messages ■ Coordinate follow-up needs

PHASE 3: POST-VISIT FOLLOW-UP (Within 24 Hours)

Immediate Post-Visit Tasks:

- Visit note completed by provider
- E-prescription sent to pharmacy (if applicable)
- Lab orders placed and patient notified
- Referrals generated and scheduled
- Follow-up appointment scheduled
- After-visit summary sent to patient

Documentation & Billing:

- Visit properly coded (telehealth modifier added)
- Time documented accurately
- Insurance claim submitted
- Patient portal updated with visit notes
- Consent forms filed

Patient Communication:

- Thank you email sent
- Care instructions provided
- Patient satisfaction survey sent
- Next steps clearly communicated

Quality Assurance:

- Technical issues logged and reported
- Patient feedback reviewed
- Process improvement opportunities noted

TECHNICAL TROUBLESHOOTING GUIDE

ISSUE	SOLUTION STEPS
Patient cannot hear provider	1. Check patient volume settings 2. Test audio with "echo test" 3. Have patient try headphones 4. Restart browser/app 5. Switch to phone call backup
Video not working	1. Check camera permissions in browser 2. Close other apps using camera 3. Restart device 4. Try different browser 5. Continue audio-only if urgent
Poor connection quality	1. Ask patient to disable other devices on WiFi 2. Have patient move closer to router 3. Close unnecessary browser tabs 4. Switch to phone hotspot 5. Reschedule if quality unacceptable
Patient cannot log in	1. Verify correct link was sent 2. Check browser compatibility 3. Clear cache and cookies 4. Try incognito/private mode 5. Provide phone number for manual admission
Screen sharing not working	1. Check browser permissions 2. Update browser to latest version 3. Try different share method 4. Use alternative (describe verbally, email after)

EMERGENCY PROTOCOLS

If patient reports medical emergency during telehealth visit:

1. DO NOT disconnect the call
2. Immediately notify provider
3. Call 911 (have patient address confirmed in advance)
4. Stay on line with patient until emergency services arrive
5. Document incident thoroughly
6. Follow up with patient within 24 hours

Required Information for All Telehealth Visits:

- Patient's physical location (address)
- Emergency contact name and number
- Local emergency services contact
- Patient's pharmacy contact information

SKILLS DEMONSTRATED
✓ Comprehensive telehealth workflow management from pre-visit through post-visit
✓ Technical proficiency and troubleshooting capability

✓ Patient safety awareness with emergency protocols
✓ Quality assurance and process improvement mindset
✓ HIPAA-compliant virtual care coordination
✓ Professional patient communication in remote setting
